

The Wheel

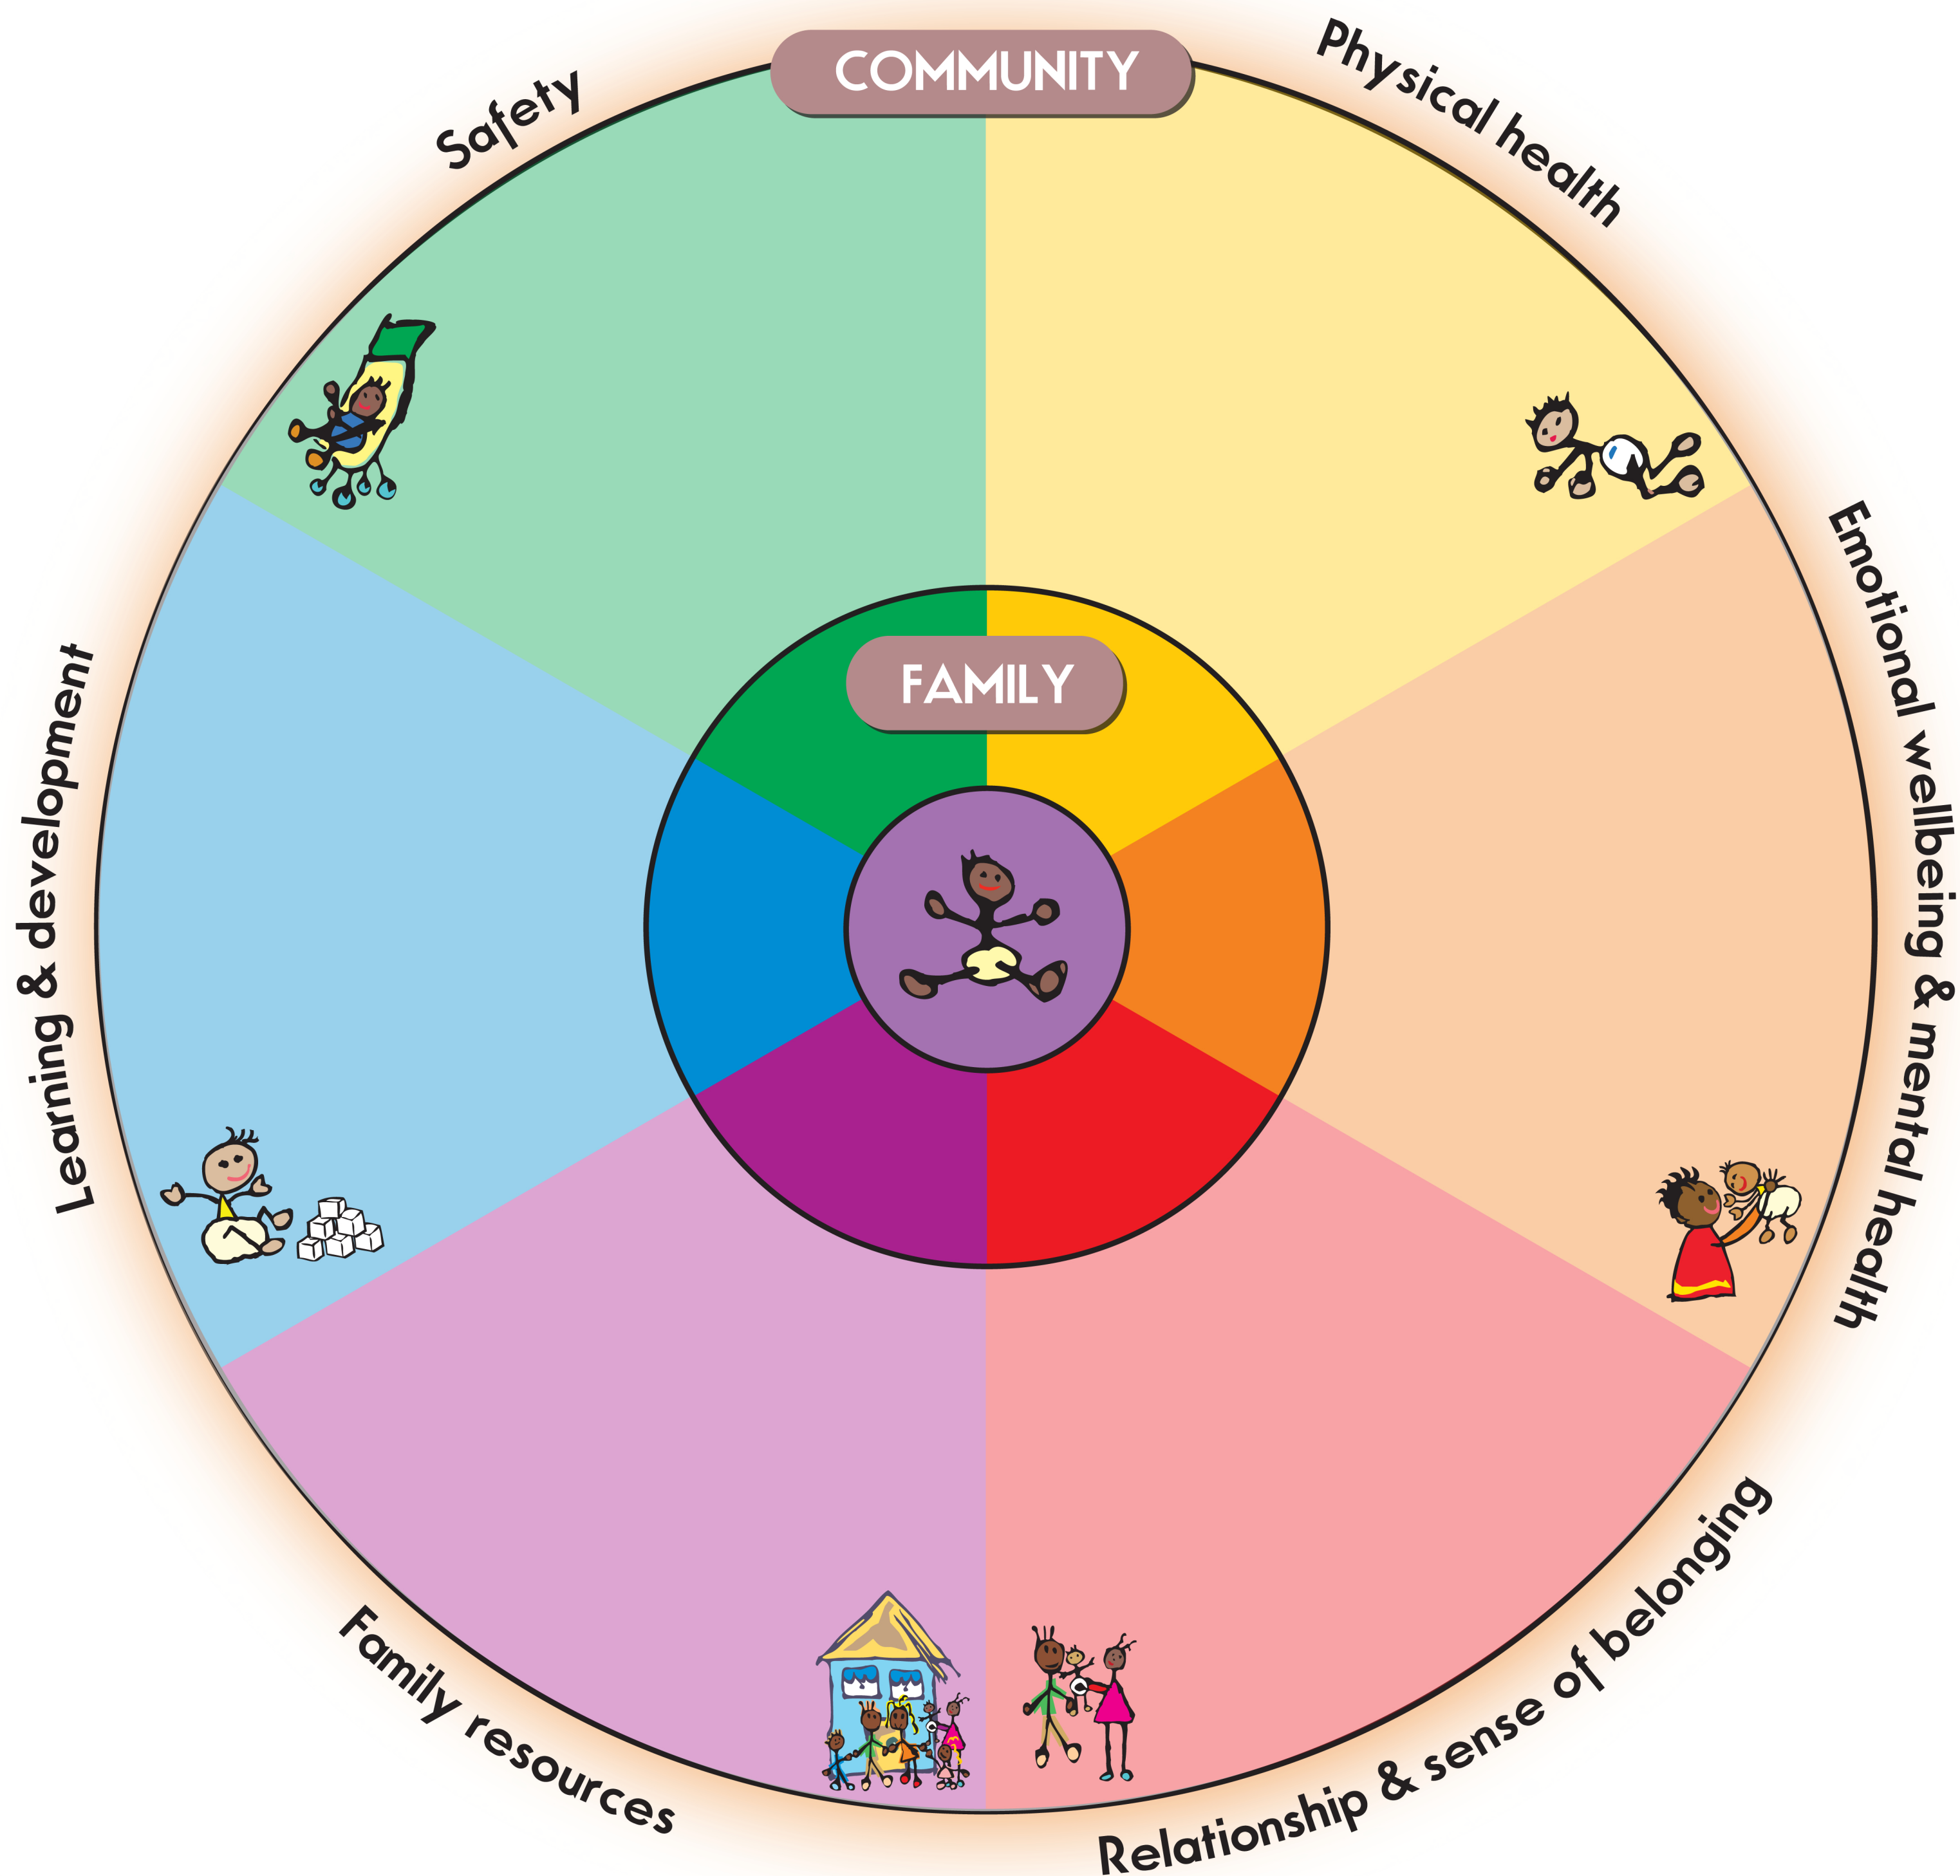

tuning in to a little one's life

This Wheel can help us to tune in to the important areas of a child's life.

Use it to talk with families about:

- what they are already doing to help their little one feel cared for and safe
- any worries they may have about their little one
- new things they can do to help and support their little one
- any extra information, resources or support they may need.

The Tune in to Little Ones kit is a resource for people who work with families who have a child under 2 years old. For more information visit the Department of Children and Families – Publications (childrenandfamilies.nt.gov.au).
